

## CAN WE FIX IT?

We often receive requests for repairs on goods that should be replaced. Understandably, sometimes you just want a few more months out of your product, and a few dollar patch will add life to your product. We've included information and photos below on pants that can and cannot be repaired.

Stretch denims are tricky to repair. We may suggest not patching, as the patch will tear out over time on stretch denims, as you bend and stretch at the knee and near the zipper. See photo examples below.

It can be repaired, but may give out over time.</p> <p data-bbox="248 1228 789 1323">Note, in the second photo, the fabric is becoming thread-barren, and would need a full patch, or we may suggest replacement of good.</p>	<div data-bbox="1045 390 1365 638">  </div> <div data-bbox="1073 686 1333 1031">  </div> <p data-bbox="938 1066 1479 1228">In the first photo, the tear is near the zipper, and the patch will tear out again over time, due to bending and stretching. It is also near a seam, and our equipment needles will break trying to patch through a thick seam.</p> <p data-bbox="927 1264 1487 1358">In the second photo, the fabric is becoming thread barren throughout the garment. We cannot replace worn fabric.</p>
